

Liquid ILLUSION

CLEAR FLORAL SETTING RESIN

Add the appearance of pure, natural, sparkling water to your silk flower arrangements - simply Mix and Pour.

FOR THE BEST RESULTS, PLEASE READ AND FOLLOW THESE INSTRUCTIONS BEFORE BEGINNING PROJECT.

Understanding how the product works is essential for obtaining good results time after time under different conditions of room temperature and pour sizes.

You can create a natural beauty unseen in other silk arrangements but please keep these considerations in mind before proceeding; Some stems may lack a color fastness which may cause varying degrees of clarity. The addition of some foreign materials such as grease may cause a reaction creating bubbles or splintering. Do not use anything irreplaceable in your arrangement. Practice arranging your flowers before you pour your "Liquid ILLUSION" into the vase. Hold the bouquet in your hand and move the flowers up and down until you are happy with their placement. Use wire cutters to trim the stems once you are satisfied.

DIRECTIONS FOR USE

Product is sensitive to external temperatures. Do not mix or cure product in direct sunlight. Read and follow all safety precautions. Mix **Liquid ILLUSION** when the product or room temperature is between 60°-80°F.

Setting Time: will take 24 - 48 hours.

Note: we do not recommend using more than 3 - 8oz. kits in one pour (24oz. total mixture)

If crystals form in the resin compound during storage, we suggest you heat this bottle in warm water (120°-130° F.) until the crystals re-dissolve.

MIXING INSTRUCTIONS

1. Pour both bottles of **Liquid ILLUSION** into the plastic blister tray.

Mix with the enclosed stir stick until the liquid becomes clear, approximately 2 minutes. If you do not intend to use the complete kit measure out equal amounts of resin and hardener then mix for 1-3 minutes until mixture is clear and pour into your vase. Bubbles will disappear as mixture sets.

Always mix in clean unwaxed paper, plastic cups or a glass container (no Styrofoam) or buckets. Mix well for 1-3 minutes. Sides and bottom of container must be scraped for thorough mixing with a non metal stirring stick.

2. Pour **Liquid ILLUSION** in base of vase, being careful not to splash on the vase walls.

3. Arrange floral product in vase.

To hold your flowers in place while curing, if your vase does not have a narrow opening, simply place tape on both sides of your flower stems across the neck of the vase. Remove after **Liquid ILLUSION** has cured and shape flowers into a natural look.

4. Leave finished vase arrangement on a level surface or at least 24 hours or until set.

WARNING-FATAL OR HARMFUL IF SWALLOWED - If resin side is swallowed, induce vomiting and CALL A PHYSICIAN IMMEDIATELY. If hardener is swallowed, DO NOT INDUCE VOMITING. Dilute by giving water or milk to drink if victim is conscious. GET MEDICAL ATTENTION IMMEDIATELY. If combined mixture is swallowed, DO NOT INDUCE VOMITING. Dilute by giving water or milk to drink if victim is conscious. GET MEDICAL ATTENTION. **SEVERE EYE IRRITANT** - in case of eye contact, flush with water for ten minutes and seek prompt medical attention. **SKIN** - Resin and hardener are skin irritants and may cause allergic reaction. Protective clothing, including plastic gloves, should be worn while handling this compound. If **POLYMER** accidentally comes in contact with skin, wash affected areas with soap and water immediately. **AVOID INHALATION** - Use in well ventilated areas. Resin contains epoxy bisphenol, a resin. Hardener contains a polyamine curing agent. Polymer should be used only by adults or under close supervision by an adult. **KEEP OUT OF REACH OF CHILDREN.**
